RM-116 Power relay module, 16 form C relays

RM series power relay modules like RM-116 can be mounted on different DIN rail, such as TS-15, TS-32 or TS-35. Every channel of RM-104, RM-108, and RM-116 contains 1 Form C relay. The reverse polarity protection is provided to prevent improper operation. Every channel also has an LED to indicate its status. RM series modules include 4-channel relays, 8-channel relays and 16-channel relays versions for different applications.

Specifications

- Rated current for each relay: 16A
- Provide one N.C. and one N.O. for each channel
- Max. Peak current: 30A
- Max. Switching voltage: 400V AC
- Standard contact material: Ag Cd0
- Input Voltage: DC 24 V
- Din Rail Mount
